

PROGRAM OVERVIEW

Together We Can Care for *Every Child*

Schools are facing **rising absenteeism, classroom disruptions, and staff burnout** driven by chronic illness, behavioral health issues, and missed preventive care. All of this in an environment of increasing mandates and tightening budgets.

Care Eleven's School Health Program is designed to help. We can help you meet all of your mandated service requirements through a single contract at the lowest cost to you. We also deliver no-cost, trusted, whole-student care (physical, behavioral, chronic condition management, and support for social needs) directly to students during the school day. We seamlessly add qualified health resources to your team, keeping students healthier and classrooms focused on learning.

This program is a partnership between schools, Care Eleven Health, the Louisiana Department of Health, and State Medicaid. We don't replace your existing health teams—we support them. Care Eleven works hand-in-hand with school staff, honoring existing relationships while expanding your capacity to meet student needs more effectively.

There is no better place to engage kids in healthcare than in schools.

The Care Eleven School Health Program is an **exciting new** model for student health services, designed to cover school mandates and expand care with additional impactful core services.

Flexible solutions that take the complexity and burden out of meeting health mandates.

Supplementary whole-student care, including comprehensive physical and behavioral health services, chronic condition support, preventative health, social determinants of health screenings, and specialty referrals at **no cost** to schools or families.

A fully managed partnership model that includes contracting, compliance, secure data systems, and reporting aligned with district and state requirements.

A collaborative relationship that respects your existing structures and works to strengthen your school community. We work within your scheduling system to minimize class disruptions for care during the school day.

Proven statewide, this program has already been rolled out in schools across the state, demonstrating measurable improvements in student health and family well-being.

A Comprehensive School Health Program Already Proven Across Louisiana

Care Eleven Health is your trusted partner for school health programs that drive real results. Our integrated approach supports your staff, reduces daily burdens, and engages students in meaningful, measurable ways. With flexible models tailored to your needs, we make it easy to partner in the way that works best for your school. Book a quick exploratory session to learn more about:

Mandated School Health Services — Provided through a single contract at the lowest cost to you.

Care Eleven Health helps schools meet state-mandated health requirements with ease. From vision and hearing screenings to immunizations and onsite medical personnel staffing, we offer customizable services to support compliance — whether you need a full solution or just help filling in the gaps. Additional options like sports physicals, staff training, and medical oversight are also available. Plus, we assist schools in pursuing Medicaid reimbursement where applicable, helping you stretch your budget further.

Whole-Student Primary Care, Delivered On Campus — at No Cost to Schools

Care Eleven Health provides comprehensive, school-based primary care services for students enrolled in Medicaid or participating health plans — with zero cost to schools. Our team works alongside your existing staff to deliver five key visit types, including annual wellness checks, chronic condition management, behavioral health screenings, counseling, and social needs support. It's a simple, high-impact way to improve student health, reduce barriers to care, and help ensure students are present, engaged and ready to learn, with district-wide benefits like reduced absenteeism and improved graduation rates.
